2018 EDUCATION IMPACT REPORT

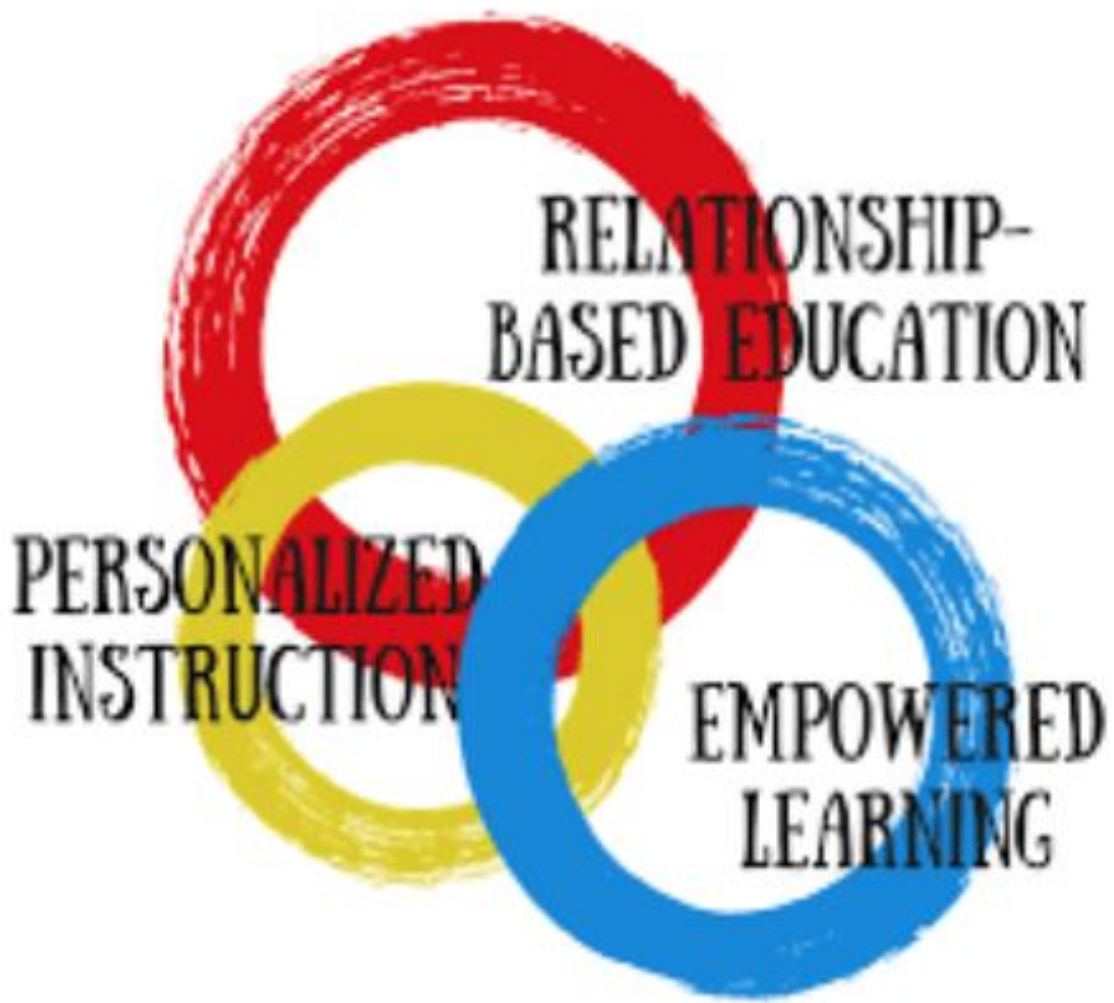

Traditional vs. customized learning models

Schools “as we know it”

- Education is incremental
- 100+ years
- Schools “as we know it”
- This is how we always do it
- This is how we are always going to do it

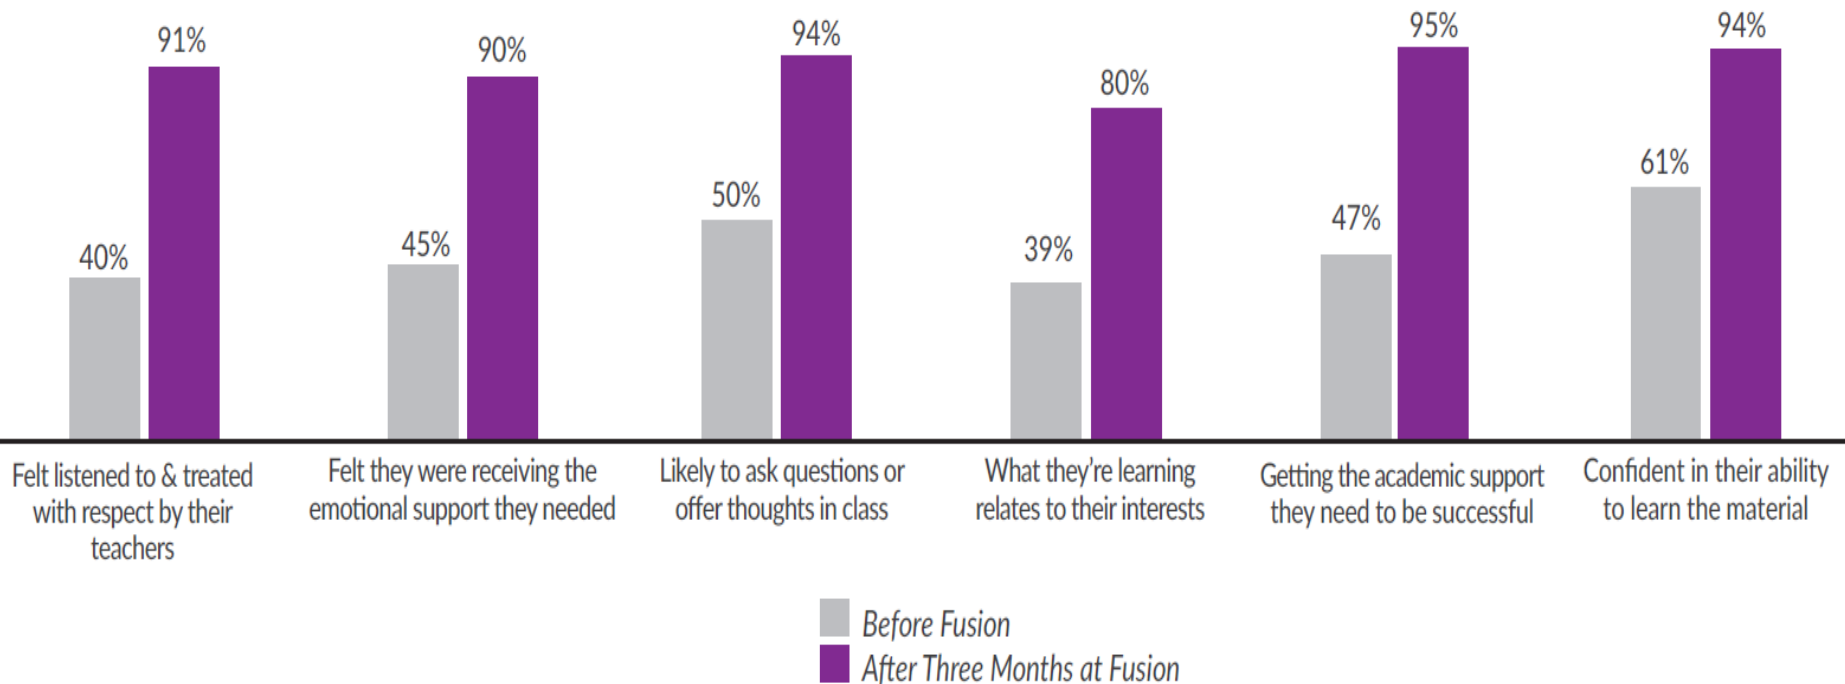

New Educational Models

- Life changing
- Dream making
- Creating an entity that focuses on a whole child approach (i.e., social emotional academics)
- How can we improve?
- How can we focus on the future?

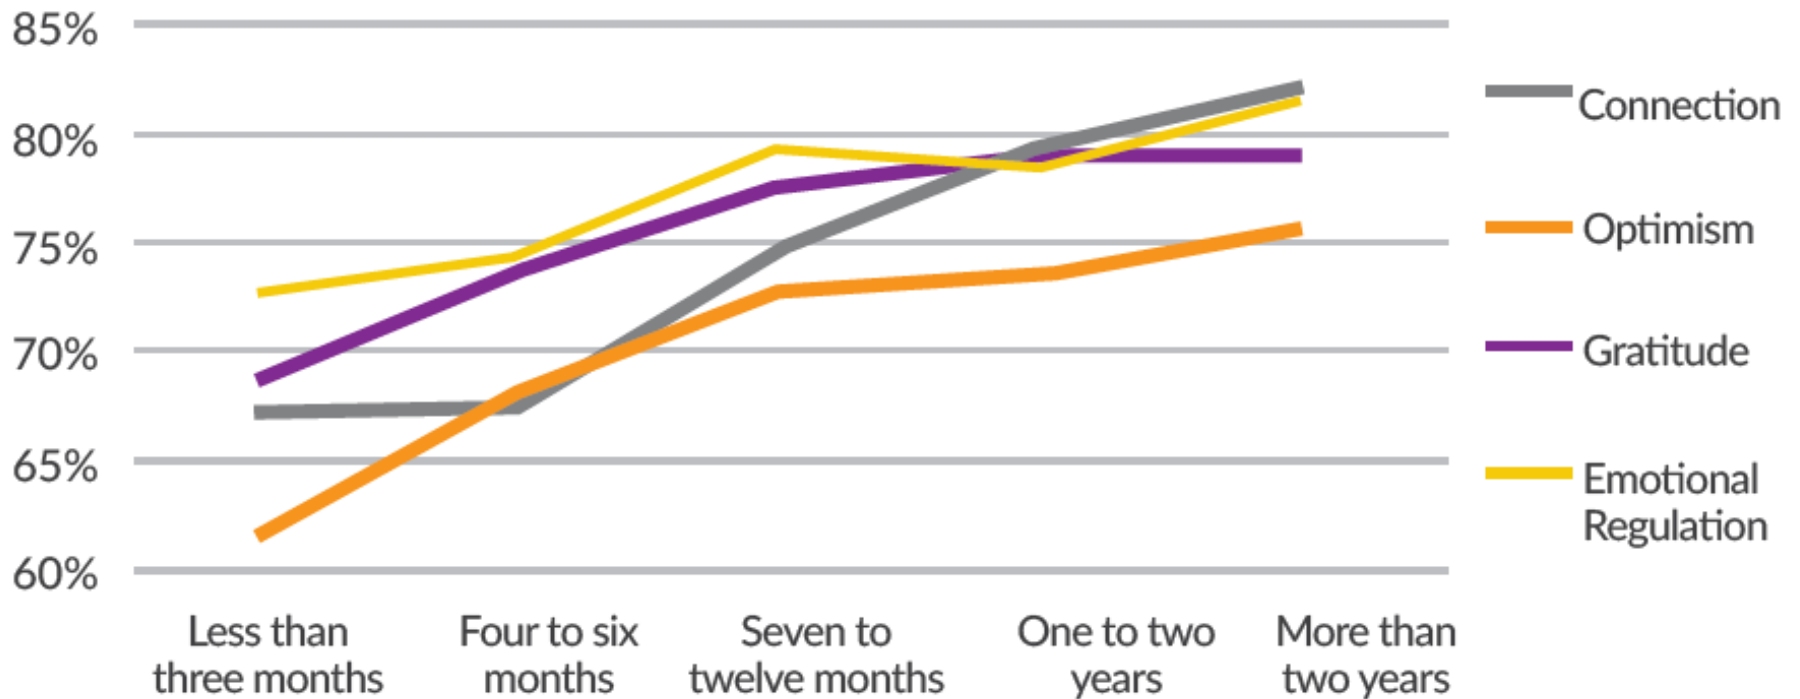

Before a customized learning model, many of our middle and high school students felt **disconnected, unsupported, unsafe, and unsuccessful.**

FUSION HAS A QUICK AND LASTING IMPACT ON STUDENT SUCCESS

Data demonstrating **increasing positive impact** over time in a customized learning model
